

TECHNICAL DATA SHEET

CARBON FIBER FABRIC CA200

Introduction

Carbon Fiber is the most advanced and popular reinforcements in current time, which has lightweight, high strength and other excellent features. It could be widely used in aerospace, transportation, building materials, medical equipment, sports equipment and other fields, AMP carbon fiber fabric can compatible with Epoxy or Polyester and other specially Resin,

Properties:

Uniform thickness
Good mold conformably
High strength retention

Specification:

		CA200	
Weight		200g	
Thickness		0.20mm	
Weave way		Twill	
Input Yarn	Weft	3k	
	Warp	3k	
Structure	Weft	50 ends/cm	
	Warp	50 ends/cm	
Moisture Content(%)		< 0.20	
Width (mm)		1000mm, 1270mm, according requirement	
Package weight(kg)		50meters/roll, according requirement	

Remark: Special products are available according to customer's requirement.

Packing:

The packing is according customer's requirement.
Each roll with a plastic bag and carton.
